A SECURE P2P MOBILE
PAYMENT SOLUTION THAT'S
EASY AND CONVENIENT
FOR YOU AND YOUR MEMBERS

Send money to anyone, anytime, using ANY mobile device

With PayMōli, it's simple for your members to send money to anyone, any time, using any mobile device - and for you to keep your members' money at the credit union, protected in their existing account.

This **person-to-person** (P2P) mobile payment solution provides your members with a secure way to make payments to anyone they know at any time through you, their trusted provider.

Catalyst Corporate offers credit unions the premier PayMōli mobile app, which credit unions may brand with their own logo. Members see your logo in the app as soon as they register to use the app. This mobile P2P solution is easy to implement, allowing users to transfer funds from their account to a friend's account quickly and easily.

PayMōli is processed through ACH, so there are no new operational steps, and there is no third-party middleman removing funds from member accounts. Plus, with Catalyst Corporate's solution, there are no credit union installations; members simply download the iOS or Android app from the app store.

PayMōli

PayMōli Benefits:

- P2P solution for your members
- Safe and secure
- Keeps members' funds in their checking or savings account
- Members can send payments to anyone with an account at a financial institution
- Processed as ACH
- Ongoing enhancements will bring new features, such as a real-time option via debit card rails in second quarter 2021

The privacy and security of your members is of utmost importance.

In the best interests of credit unions and their members, PayMōli deploys additional data security, privacy and compliance measures that are not available with other providers.

In today's world, convenience is key. Offering a safe mobile solution that allows your members to make secure payments at their fingertips to people they know and trust gives your credit union a competitive advantage and keeps your members and their money at your credit union.
